

JDBC2XML Installation

JDBC2XML Installation

Deb installation under Debian-based Linux

As of 2013-07-04 resp. 1.1.1 we offer a debian packages in our debian repository, <http://deb.clazzes.org/>.

```
# retrieve archiver key
wget -O - https://deb.clazzes.org/gpg/pba-archiver.clazzes.org.asc |sudo apt-key add -

# retrieve deb source
cd /etc/apt/sources.list.d
test -f any-jpkg-1.list || sudo wget https://deb.clazzes.org/any/sources.list.d/any/any-jpkg-1.list
sudo apt-get update

# install package
apt-get install jdbc2xml
```

Manual installation under Linux

To install the database-dump tool, download the latest release as `jdbc2xml-*-distribution.tar.bz2` archive (usually the top-most file in each version subdirectory) from the maven repository at <https://maven.clazzes.org/org/clazzes/jdbc2xml>

Put the archive's content (`jdbc2xml-*/`) in `/opt` or `/opt/java`.

Run the installation script `bin/installjdbc2xml.sh` to create (or update) symlinks in `/usr/bin`.

Installing for Windows

From <https://maven.clazzes.org/org/clazzes/jdbc2xml> download the latest installer, i.e. `jdbc2xml-1.X.X-setup-x*.exe`, and execute it.
