

MinGW Home

Introduction

This projects constitutes a complete cross-compilation toolchain for ubuntu LTS and debian stable build on top of the excellent work of <http://mingw-w64.sourceforge.net/>.

The packages a accompanied by a rich set of open-source libraries ported to this cross-compiler toolchain.

For Details on the ported libraries, browse the actual debian repository pool as linked in the per-generation meta info pages, ie. [MinGW-5 meta infos](#).
