

# Authentication Tools Home

This is the home of the Authentication Tools space.

To help you on your way, we've inserted some of our favourite macros on this home page. As you start creating pages, blogging and commenting you'll see the macros below fill up with all the activity in your space.

## Overview

The Authentication Tools started when we decided to give [DomainPasswordLoginService implementations and tools](#) a home separate from [Clazzes-Utils](#).

We are currently implementing a first backend called (SDS).
