

# Git Hints

A shot summary of the most-needed survival pages for git:

- For svn-addicted veterans:
  - A tutorial <https://git.wiki.kernel.org/index.php/GitSvnCrashCourse>
  - An educational comparison of concepts: <http://www.codemag.com/Article/1105101/Git-for-Subversion-Users>
- A small flame war with practical hints, anyways: <http://steveko.wordpress.com/2012/02/24/10-things-i-hate-about-git/>
- Specifying git shell in authorized\_keys: <https://superuser.com/questions/299927/can-you-specify-git-shell-in-ssh-authorized-keys-to-restrict-access-to-only-git>
- Using git with a central repository: <http://toroid.org/git-central-repo-howto>
- [GitHub support for Subversion clients](#)
