

Colin becomes Qt Ambassador

Colin is part of the Qt Ambassador Program

A few weeks ago I applied for the Qt Ambassador Program. The Qt Ambassador Program provides a platform for applications based on the Qt framework. Beneath, the Qt Ambassador Program offers some benefits to developers like merchandise, usage of the Qt Ambassador title and logo and participation in some other Qt Programs.

Today i received a mail from Nokia:

Congratulations! You have been accepted into the Qt Ambassador Program.

Thank you very much, we feel very honoured! We will give our best to improve Colin and to meet the requirements. For more information about the Qt Ambassador Program visit the [Qt Ambassador main page](#) or the project page of [Colin](#) there.
