

JIRA.clazzes.org RIP

Due to ITEG's ISO-27001 efforts we had to migrate most Jira projects to our non-public jira.iteg.at.

To keep **old deep links** to issues alive, we are now redirecting jira.clazzes.org to jira.iteg.at.

The single remaining non-ITEG project, Colin, untouched since 2013, has been exported (using "Project Configurator") to eventually allow for reanimation.

A **full backup** of Jira's installation directory, home directory, and database has been created, too.

We apologize for any inconveniences this reorganization may cause.
