

IPv6 Hints

Introduction

Like it or not, IPv6 is coming 😊

Unfortunately there are still some quirks with applications in one-and-a-half-stack setups, and different configuration files require different syntax dialects.

The following notes should help in most situations:

- [HowTo invite applications to use IPv4 or IPv6](#)
- [IPv6 developer links](#)
- [IPv6 Linux snippets](#)
- [IPv6 Syntax Specialities](#)
- [Static IPv6 address for Windows XP](#)
