--

The jaas-login-service is provided as an OSGi bundle, which may be activated by

```
obr:addurl http://maven.clazzes.org/repository.xml  
obr:deploy jaas-login-service
```

The maven artifact is:

```
<groupId>org.clazzes.login</groupId>  
<artifactId>jaas-login-service</artifactId>
```

Functionality

The JAAS login service authenticates against users in a JAAS (*Java Authentication and Authorization Service*) domain.

Configuration

The JAAS login service may be configured using the OSGi configuration PID `org.clazzes.login.jaas` using these configuration values:

Key	Default Value	Description
defaultDomain	karaf	The JAAS domain to use for principals, which do not contain a domain.
