

LibO-Server (Libre Office Server)

Server applications can benefit a lot from using LibreOffice's capabilities to read and write several office file formats (like doc, docx, odt, ods, xls, xlsx), and PDF.

LibO-Server makes it easy to **run a libre office instance as operating system service**.

Repositories:

Debian packages are available from deb.clazzes.org (Category `libo`).

Windows installers are available at download.clazzes.org/libo-server/.

Subversion: <https://svn.clazzes.org/svn/oooengine/trunk/libo-server/>.
